

Twitter or Musk is partwise responsible for worldwide violations of ethical and moral principles, environmental and international laws, Children's and Human Rights issues. Free speech, fundamental rights and further laws were threatened and violated, too. Elon Musk and Co. is responsible to fix so much as possible and must take responsibility. It must have finally consequences or it will have a bad end for Twitter in future – no amount of money will change that history or reality! Many humans were harmed, got sick, were threatened and even died. A lot of experts, doctors, physicians and scientists confirm and can proof these opinions.

There are countless evidences for violation of ethical and moral principles, Children's and Human Rights by Twitter. Discrimination, violation of Human and Freedom Rights, corruption and oppression, hidden methods of censorship and shadow banning practices are just some serious issues... the link list is just the tip of the iceberg! You can use [VirusTotal](#) to check the links before and analyze suspicious files, domains, IPs and URLs to detect malware and other breaches, automatically share them with the security community. For professional translation you can use [DeepL](#).

**Violation of ethical and moral principles Children's and Human Rights by Twitter. Discrimination, threat to the rights of freedom, oppression, hidden methods of censorship and shadow banning practices:**

More critics, links and voices will follow. If you know interesting articles from other regions of the world like in Africa, Australia, Middle East, South Asia and South America. Feel free to send to [feedback.at.greeningdeserts.com](mailto:feedback.at.greeningdeserts.com).

All these cases and events are just the tip of the iceberg. It are just some evidences and links of criminal or dubious practices of Twitter they try to hide or excuse since years by extra campaigns, big money and influenced media. There is a database of leaked documents and leaks of insiders will come out in future if Twitter do not really change, compensate and excuse to all the victims they harmed - the blocking and suspension actions are only the lesser evil. Twitter lied about not doing shadowbans or similar oppressing measures. All these evidences showing clearly that Twitter violates international rules. These violations are serious and international courts should stop to ignore or partially overlook it. It's like ineffective monitoring or non-acting until it is too later. Similar like the appeacement politics in the Second World War.

### **Twitter shadowbans and shadow banning:**

Send us feedback and interesting links if you know.

Because of all these problems on and with Twitter, oppressions, attacks on our accounts, projects and works we want to distance from Twitter until they really changed most of the problems and finally care or really respect mentioned principles, Childrens Rights, Human Rights and real freedom of speech. These „social networks“ or companies should understand that they represent not nearly a few percent of the whole internet and nature don't need them to exist! It is a shame that Twitter blocked, suspended and has done shadowbans or shadowbanning for years. We have analysed it with several experts and countless researches (intern and extern), with AI, special tools and monitoring

programs - they all can proof and show evidences for Twitters shadow banning practice of critics, misuse of accounts reporting, organizations or people they don't like. One very easy method is to check video views on big accounts with much followers and traffic. How can it be that these videos get no or just a couple views after tweeting?? It is very alarming that Twitter makes no exception for environmental, Childrens, Womens and Human Rights... a big shame for a 'social network' or a 'social platform'. The blocking of Greening Deserts projects and suspension of the project accounts @ChangeGamesCom and @GreeningDeserts is an attack on human rights and attempts to damage the good image or reputation of the projects and works. It is also a kind of defamation and discrimination.

Can Twitter and Twitter's responsables tell us why they don't ban or suspend accounts of mass murderers when they know full well!? This knowing support of nature destroyers (Ecocide), murderers, human rights violations and environmental destruction through Twitter is deeply criminal, illegal and unethical! Why are there no legal consequences and why are all these proven cases not finally condemned internationally? How can so many legal institutions and international courts continue to tolerate and allow this injustice and this huge injustice? This is a disaster for the international rule of law, human rights and questions the so-called humanity and 'civilization'!

Who believes in Fundamental Rights, Freedom of Speech, Childrens and Human Rights don't act so like we all can see today and in history. Responsibles of Twitter should start to really change things into better and improve Twitters moral and ethic principles before it will be to late. No money, no Musk and Co. can hide these problems, oppress the truth and continue to harm environment, life forms and humans. History tells only true will to change and consequent improvement will have success - a better future for us all not just for a few interest groups, consumer or user groups. Please Elon Musk wake up and come down to ground from the cloud No. 7, if you don't allow or understand critics on yourself and Twitter, friendly meant rhetorics or parodies you are not worth to own Twitter which was a relatively save and free space - also for the employees. This is my short statement on the decision team and responsible division who banned, blocked and suspended Greening Deserts account, projects and work so many times - including one time suspension of my personal account and private project accounts of Green Change Games and Trillion Trees Initiative since late 2021.

Twitter should be grateful that so many abuses and problems are and have been pointed out to them. This allows everyone to learn from history and do better for the future. It is also not very social of such big companies to benefit from Greening Desert's work and projects for years, give nothing back and not even say thank you. Just by providing various analytics and data to advertisers, Twitter has benefited from us and millions have probably been made from it. It is similar to the prominent imitators of our Trillion Trees initiative which was founded years before.

You can read more on the project pages and all the published work. You even

can ask over thousands of people who were informed about the most important global issues and real sustainable solutions.

Just a few days after tweeting about critics and Musks Twitter deal Green Change Games and Greening Deserts Twitter account was suspended. Now we see that Elon Musk and Co. don't like personal critics and don't understand fun or parody. We suspect he will also want to eliminate or silence other critics and competitors in this way. It is a shame that he uses his company and power to discriminate and oppress others – especially single persons, minorities, disabled or sick people who suffer much more by his egoistic and violent actions. It is no fun or joke to treat humans in such a way.

Share the truth and show some support if you have some courage.

Update May:

<https://time.com/6172636/twitter-policy-failures-elon-musk>

All data were deposited several times with top lawyers, human rights organizations, anti-corruption and human rights experts or agencies! Due to massive attacks and suppression from some parties or bodies, also from the direction of Twitter, the updates of the article were stopped. It is not sure if the work can continue under these circumstances, especially since there were some very violent attacks and, depending on the point of view, even attempts of death attacks! Much were recorded and direction is clear!! We must ask were is humanity, ethical, moral and international justice!!?? Why can do famous, responsible and powerful companies or people what they want without real consequences?
